

The Grayson Salt Water Pool

By Wilbar

The Grayson Salt Water Pool is a classically designed pool built with modern day technologies. The Grayson features a supersized resin frame and a multicoated steel wall which includes a wall saver Stainless Steel insert panel. Most pool failures begin where the skimmer and return are cut into the wall. Our super stainless steel panel extends the life of ordinary pools – don't buy a pool without it! Finished in a beautiful pewter gray, our Grayson pool will provide years of good looks and functional strength to the most discerning pool buyer.
